## Abstract

This document is about the design of the Verizon's website in the context of the Hypermedia and Applications Course and contains the following diagrams C-IDM, L-IDM, P-IDM. As an attachment an interactive and static mockup of the website is included, this mockup has been created using the Pencil Mockup Tool.
The website has been design with the following principles in mind:

- simplicity
- clarity
- usability
- easy access to all functionalities

The mockup of the website has been created with realistic content coming from different website among which we can mention: tim.it, verizonwireless.com
